ELECTROMYOGRAPHY SUMMER SCHOOL

Crete - Greece

10-13 JUNE 2025

<https://welcome.uoc.gr/2025/02/06/electromyography-summer-school/>

Scientific coordinator:

Ioannis Karakis, MD, PhD, MSc

Coordinating Department / Laboratory: Neurology

ioannis.karakis@uoc.gr

Educators:

Ioannis Karakis, University of Crete, Heraklion, Greece

Sophia Erimaki, University of Crete, Heraklion, Greece

Devon Rubin, Mayo Clinic, Jacksonville, FL, USA

Paul Barkhaus, Medical College of Wisconsin, Milwaukee, WI, USA

Harrison Taylor, Emory University School of Medicine, Atlanta, GA, USA

Sanjeev Nandedkar, Medical College of Wisconsin, Milwaukee, WI, USA

Carolina Garcia, Emory University School of Medicine, Atlanta, GA, USA

John Kincaid, University of Indiana, Indianapolis, IN, USA

Georgios Manousakis, University of Minnesota, MN, USA

Andrianna Carter, Emory University School of Medicine, Atlanta, GA, USA

Anna Vavouranaki, University of Crete, Heraklion, Greece

In collaboration with multiple academic institutions in the United States, this hybrid (in-person and via zoom) course will review the field of Electromyography (EMG) across the age spectrum and its application for the diagnosis and treatment of Neuromuscular Disorders. It will include the fundamental tenets of signal generation, technical considerations of signal acquisition, types of recordings and reporting standards. The course will discuss both basic aspects in the field of electrodiagnostics (e.g. fundamentals of nerve conduction studies and needle EMG), as well as more advanced topics (late responses, repetitive nerve stimulation, single fiber EMG, neuromuscular ultrasound and autonomic studies), with a focus on their clinical applications. The course will include daily small-group, hands-on workshops by international experts in the field and interactive quizzes to complement the formal lectures. There will be a welcome dinner on Tues 10 June 2025 evening and an optional excursion to the island of Spinalonga on Sat 14 June morning.
