Scientific coordinator:

Ioannis Karakis, MD, PhD, MSc

Coordinating Department / Laboratory: Neurology
ioannis.karakis@uoc.gr

EDUCATORS:

- Ioannis Karakis, MD, University of Crete, Heraklion
- Angelica Rivera-Cruz, MD, University of South Florida, Tampa, FL
- Vasileios Kokkinos, PhD, Rutgers University, New Brunswick, NJ
- Andreas Alexopoulos, MD, Cleveland Clinic, Cleveland, OH
- Edward Faught, MD, Emory University, Atlanta, GA
- Katie Bullinger, MD, Emory University, Atlanta, GA
- Efrosini Papadaki, MD, University of Crete, Heraklion
- Valeria Moncayo, MD, Emory University, Atlanta, GA
- Stefan Schuele, MD, Northwestern University, Chicago, IL
- Sotirios Mitropanopoulos, MD, Mayo Clinic, Scottsdale, AZ
- Abed Alwaki, MD, UTHealth Houston Neurosciences Center, Houston, TX
- Daniel Drane, PhD, Emory University, Atlanta, GA
- Nikolaos Haliasos, MD, National and Kapodistrian University, Athens
- Pelagia Vorgia, MD, University of Crete, Heraklion
- Vasileios Kimiskidis, MD, Aristotle University, Thessaloniki
- Christos Papadelis, PhD, University of Texas, Fort Worth, TX

In collaboration with 11 academic institutions in the United States and in Europe, this hybrid (in-person and via zoom) course will review the management of drug-resistant epilepsy (DRE). It will include principles and case based scenarios of rational pharmacotherapy with traditional (1st and 2nd generation) and novel (3rd generation) antiseizure medications, non-pharmacological treatments (ketogenic diet) and workshops on various neuromodulation modalities. Emphasis will be given to the basic tenets of presurgical evaluation for destructive (resections, ablations) or disconnective (corpus callosotomy, hemispherectomy) surgery, as well as to special populations (pediatric, pregnant women, elderly). There will be a welcome dinner on Tues 16 June 2026 evening and an optional excursion to the island of Spinalonga on Sat 20 June morning.
